

Jiayongshuo

173-6229-2247 | eiddiedev@qq.com | github.com/eiddiedev | eiddie.me

Portfolio: eiddie.me (project collection / live demos / demo videos)

Target: Design Engineer Intern / Experience Design Frontend Intern / UX-Oriented Internship (Available for Summer Internship)

Experience-focused frontend builder with strong visual taste and hands-on practice turning content ideas into polished, interactive, and shipped digital experiences through design and code.

Education

Hunan University of Technology | B.Eng. in Artificial Intelligence

Sep 2024 - Jun 2028

Relevant Coursework: Machine Learning, Deep Learning, Computer Vision, Data Structures and Algorithms, Database Systems

Experience

The Room | Founder Community

Remote | Aug 2026 - Present

Founding Member · Head of Design | theroomcommunity.org

- As a Founding Member and Head of Design, own The Room's brand identity, product experience, and technical delivery, including frontend, backend, APIs, and database design.
- Collaborate remotely with the founding team to build the brand and content system and create social and on-site materials for Speaker Series, Founder's Dinner, and partner events.

Projects

YeVerse - Immersive Music Culture Digital Experience

ye.eiddie.me

Independent Project | React / TypeScript / Three.js / Vite / Spotify Embed

- Built an immersive digital experience around music and cultural content, independently owning the visual system, modular structure, interaction rhythm, and frontend implementation.
- Designed an interactive timeline, a 3D album shelf, and cinematic transitions to turn content browsing into a more atmospheric and story-driven experience.
- Shipped it as a live experience and received strong positive feedback from music fans on social platforms.

Road to 2026 - Pixel Football Management Game

fifa.eiddie.top

Core Developer / Game Designer | React / TypeScript / Vite / 11v11 Runtime

- Owned planning and development, building a complete loop from team selection, call-ups, formations, and logistics to live matches, in-game decisions, and post-match review.
- Designed national teams, player pools, formations, tactical stances, weather, extra time, and penalty systems, then validated strategic value through simulation scripts.

EDReading - AI-Powered English Reading Tool

eiddie.top

Independent Project | Next.js / TypeScript / Supabase / AI API

- Designed a clear reading workflow for long-form English content and independently built the core interface, features, and release iterations.
- Integrated AI-based close reading analysis, dictionary enhancement, and review generation to improve usability in long-text learning scenarios.
- Reached 200+ registered users, supported PWA installation and cloud sync, and completed the first paid conversion validation.

Skills

Frontend Development: React / Next.js / TypeScript / Three.js / Mapbox GL / Framer Motion / PWA / Responsive UI

Visual and Interaction Design: UI Design / Interaction Design / Motion Rhythm / Narrative Layout / Poster Design / Video Editing / Photography

Application Engineering: Node.js / Supabase / PostgreSQL / REST API Integration / Data Storage / Vercel Deployment

AI and Product: LLM API Integration / AI Feature Design / Content Structuring / Requirement Breakdown / Prototype Validation

Additional Experience

1st Prize & Public Value Award, Douyin AI Innovator

Hackathon National Finals

Trae on Campus Ambassador

Meituan AI Hackathon National Top 30

President, Douyin Campus AI Club

1st Place, TRAEFriends Wuhan Hackathon

20+ GitHub Projects Built Independently / Collaboratively
